 MIT ADT University, Pune

SUMMARY:

The event gathered an audience of 110 people who were all enthusiastic to know about Flutter Campaign, which is an open-source framework that helps in building natively compiled apps for multiple platforms.

It began with an introduction of the facilitator for the campaign, Mr. Pushkaraj Suryawanshi, who is the Tech Team Lead at GDSC.

He taught the audience what flutter is, the basic concepts and terminologies used such as widgets, containers, pages, dart, main etc. and overtook a practical demonstration of how Flutter works, i.e the code.

A light icebreaker of “guess the word and draw” was conducted in between the session to keep the audience engaged, which was followed by an introduction to Google Fonts by the Facilitator as Day 1 ended.

The next day proceeded with the Facilitator revising the concepts that were taught the day before by asking students questions and interacting with them. After a brief break, concepts like Indexes were taught to the audience and the day concluded.

On the final day of the campaign, an icebreaker was conducted in the beginning where the audience had to guess the person based on pictures containing some of their facial features.

After that, Guest Speaker Mr. Shrihriday Bhagwat was introduced to the audience. He is a Google Developer expert and the CEO of Codeaamy.

The speaker gave the participants valuable insights about Firebase setup and coding in Firebase, signing up and saving data.

As the session came to an end, the speaker was felicitated by Mr. Rajkumar Patil, the faculty co-ordinator of GDSC and snacks were distributed to the audience as a thank you. The snack sponsor was Ambrale’s Waferwala, and the sponsorship and PR team took great effort in arranging the sponsors for the Flutter event. All in all, the Flutter event was a success.

gdsc.mitadt Tired of the never-ending Android vs iOS vs Web debate? 😞
Say hello to Flutter! 🙌
Flutter is Google's open-source framework that lets you build natively compiled apps for multiple platforms (iOS, Android, Web, Desktop, and more) using a single codebase. 🔥📱
No more wasting time developing separate versions for each OS. Flutter's got you covered with its multi-platform capabilities! 🌐

Takeaways:

- ✅ Kickstart Flutter 🌟
- ✅ Firebase integration 🍷
- ✅ Build intuitive apps 📄

Date: 26th, 27th, 28th March
Time: 1:40 PM to 4:30 PM
Venue: N518, IT Building

Ready for your Flutter revolution? Let's go! 🚀

01

FLUTTER? WHAT'S THAT?

Flutter is an open-source framework by Google for building beautiful, natively compiled, multi-platform applications from a single codebase

GDSC MITADT

02

PREREQUISITES?

All you need is a basic understanding of

- Object Oriented Programming
- VS Code

GDSC MITADT

03

PERKS

Learning a cross-platform framework that is

- Fast
- Highly customizable
- Comes with rich libraries and much more

GDSC MITADT

04

WHAT YOU'LL GAIN FROM THE SESSION?

- Kick-start to your flutter journey
- Learn about Firebase for backend connectivity
- Learn to build an intuitive app

See you there!
