## MIT Art, Design and Technology University, Pune

## 1.2.1

Percentage of new courses introduced out of the total number of courses across all programmes offered during the last five years

## **Preamble**

In alignment with MIT ADT University's (MITADTU's) commitment to fostering academic innovation and responding to emerging trends and local, national, and global needs, a significant number of new courses have been introduced across all programmes over the past five years. These new courses are reflective of the institution's continuous efforts to enrich its academic offerings and ensure relevance to evolving industry standards and societal demands. By strategically expanding the curriculum, the institution not only enhances student learning but also provides them with opportunities to develop specialized skills and competencies required in the global marketplace. The calculation of the percentage of new courses introduced follows a systematic approach, factoring in both the number of new courses and the total courses offered, which are approved through rigorous procedures involving Board of Studies (BoS) and Academic Council. Relevant documents for the same can be accessed below.
