7.3.1
Portray the performance of the Institution in one area distinctive to its priority and thrust

Preamble
Propagation of Indian Knowledge System

MIT ADT University is dedicated to promoting Indian Knowledge Systems (IKS) by integrating traditional knowledge and values into modern education. Through a combination of curriculum design, co-curricular activities, and research initiatives, the university ensures that students gain a holistic understanding of India's rich heritage in various fields. IKS is infused into academic programs of most schools as well as through interdisciplinary approaches, teacher training, and hands-on learning opportunities such as field visits and poster competitions.

Specific projects that highlight this integration undertaken specifically by the School of Vedic Sciences, School of Architecture, School of BioSciences and Research, School of Film & Television, the School of Drama, and the School of Food Technology. Research projects and certificate courses further reinforce this connection to Indian knowledge and wisdom.
